

2 SPECIFICATION3 TITLE: AUXILIARY EYEWEAR ATTACHMENT METHODS AND APPARATUS4 *This Application is a con of 10/353,628 01/28/2003 PAT 6,705,722 which is a con of
BACKGROUND OF THE INVENTION 09/184,694 11/02/1998 PAT 6,550,913*

5 1. Field of the Invention

6 This invention relates to auxiliary eyewear attachment
7 methods and apparatus, such as clip-on eyewear, and more
8 particular relates to an auxiliary eye wear for attaching
9 auxiliary sunglasses to conventional eyeglasses.

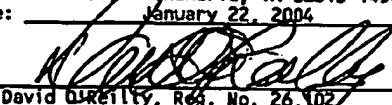

10 2. Background Information

11 Auxiliary eyewear to convert conventional eyeglasses to
12 sunglasses are very popular. They allow the user to usually
13 avoid the need for two separate prescription lenses. They can
14 also be used, but less frequently, to attach auxiliary eyewear
15 that can change the prescription of lenses. The more common
16 use, however, is to add tinted lenses to conventional
17 eyeglasses.18 A number of different designs are available for auxiliary
19 eyewear including clip-on eyewear, as well as auxiliary eyewear
20 attachment using magnets. One method of attaching auxiliary
21 eyewear is by clips. A method of attaching auxiliary eyewear by
22 clips is shown and described in U.S. Application No. 08/510,797
23 filed August 3, 1995 to the same inventor as the invention
24 disclosed herein and incorporated herein by reference. Another
25 patent describing a clip-on type of sunglasses is disclosed and
26 described in U.S. Patent No. 5,696,571 issued December 9, 1997
